

Hello Python!

Look at this code:

```
name = input("What is your name? ")

print("Hello,", name, "!")
```

Use the code above to help you. After completing each challenge below, run your program to test that it works correctly. Save each completed challenge program in a new file.

Programming Challenges

Challenge 1

Store a greeting from another language, such as "Xin chao", in a variable called [greeting]. Change `print()` so it displays [greeting], then [name], then an exclamation mark.

Challenge 2

Ask for a friend's name "and" store it in a variable called [friend_name]. Change `print()` so it displays "Hello, [name] and [friend_name]!" using [name] "and" [friend_name].

Challenge 3

Create a new program that asks for two school subjects. Display the message "I think [subject 1] and [subject 2] are great subjects!" using the two answers.
