

More Decisions

Look at this code:

```
score = int(input("Enter a score from 0 to 10: "))
if score >= 8:
    print("Excellent")
elif score >= 5:
    print("Good")
else:
    print("Keep practising")
```

Use the code above to help you. After completing each challenge below, run your program to test that it works correctly. Save each completed challenge program in a new file.

Programming Challenges

Challenge 1

Change the program so a score of 9 displays "Excellent". Test scores 8 and 9.

Challenge 2

Add one `elif` branch so scores 3 and 4 display "Keep practising". Scores below 3 should display "Try again"; the "Excellent" and "Good" outcomes stay unchanged.

Challenge 3

Create a temperature classifier with three outcomes: "Hot" at 30 or above, "Warm" from 20 to 29, and "Cool" below 20. Test 19, 20 and 30.
