

Changing Text Case

Look at this code:

```
team = input("Team name: ")
team = team.lower()
code = input("Team code: ")
code = code.upper()
print("Team:", team)
print("Code:", code)
```

Use the code above to help you. After completing each challenge below, run your program to test that it works correctly. Save each completed challenge program in a new file.

Programming Challenges

Challenge 1

Make the displayed team name uppercase and the displayed code lowercase. Falcons and f7 should become FALCONS and f7.

Challenge 2

Add a response input and store `response.lower()`. Display "Accepted" when the normalised response equals "yes" and "Not accepted" otherwise.

Challenge 3

Build a badge formatter. Ask for a first name and a two-letter group code; display the name in lower case and the group code in upper case on separate labelled lines.
