

Changing Text Case

Look at this code:

```
team = input("Team name: ")
team = team.lower()
code = input("Team code: ")
code = code.upper()
print("Team:", team)
print("Code:", code)
```

Use the code above to help you. After completing each challenge below, run your program to test that it works correctly. Save each completed challenge program in a new file.

Programming Challenges

Challenge 1

Change the program so [team] is displayed in upper case and [code] is displayed in lower case. Test "Falcons" and "F7"; display "Team: FALCONS" and "Code: f7".

Challenge 2

Ask the user to enter "yes" or "no" and store the answer in [response]. Store [response].lower() back in [response]. Use an if statement to check whether [response] equals "yes". Display "Accepted" when it does; otherwise display "Not accepted". Test "YES" and "no".

Challenge 3

Ask for a first name and store it in [name]. Ask for a two-letter group code, such as "ab", and store it in [group]. Display [name] in lower case and [group] in upper case on separate labelled lines. Test "Ava" and "ab"; display "Account name: ava" and "Group code: AB".
