

Random Whole Numbers

Look at this code:

```
import random

roll = random.randint(1, 6)

print("Dice roll:", roll)
```

Use the code above to help you. After completing each challenge below, run your program to test that it works correctly. Save each completed challenge program in a new file.

Programming Challenges

Challenge 1

Change the die so it can roll numbers from 1 to 12. Run the program several times; every result should be between 1 and 12.

Challenge 2

Generate two six-sided rolls. Display both rolls and their total.

Challenge 3

Ask for a minimum whole number and store it in [minimum]. Ask for a maximum whole number and store it in [maximum]. Use `randint()` to generate a number between [minimum] and [maximum], including both values, and store it in [target]. Test 4 and 4; display "Practice target: 4".
