

Hello Python!

Look at this code:

```
name = input("What is your name? ")

print("Hello,", name, "!")
```

Use the code above to help you. After completing each challenge below, run your program to test that it works correctly. Save each completed challenge program in a new file.

Programming Challenges

Challenge 1

Change the example so it stores a greeting in another language, such as "Xin chao", in `greeting`. Change `print()` to display `greeting`, then `name`, then `!"`.

Challenge 2

Extend the example so it also asks for a friend's name and stores it in `friend_name`. Display "Hello," followed by `name`, "and", `friend_name` and `!"`.

Challenge 3

Create a program that asks for two school subjects and stores them in `subject_1` and `subject_2`. Display "I think `subject_1` and `subject_2` are great subjects!".
