

Hello Python!

Look at this code:

```
name = input("What is your name? ")

print("Hello,", name, '!')
```

Use the code above to help you. After completing each challenge below, run your program to test that it works correctly. Save each completed challenge program in a new file.

Programming Challenges

Challenge 1

Change the `print()` message to `print(greeting, name, "!")`. Assign (save with the `=` symbol) a new greeting in another language, like `"Guten tag,"`, to the variable `greeting`.

Challenge 2

Change the program to ask for and output your friend's name too. Change the message inside `print()` to also output `"and"` and your friend's name.

Challenge 3

Create a new program which asks the user what two subjects they study in school. Output a message to the user which tells them `"I think subject1 and subject2 are great subjects!"`.
