

Lists

Look at this code:

```
item = input("Pack one item: ")
packing_list = ["water", "map"]

packing_list.append(item)

print("Packing list:", packing_list)
```

Use the code above to help you. After completing each challenge below, run your program to test that it works correctly. Save each completed challenge program in a new file.

Programming Challenges

Challenge 1

Prepare the starter for a weekend trip by replacing the initial list with three useful items. The user's extra item must still be appended and visible in the final list.

Challenge 2

The user should add two items in total. Ask for a second item, append it, then show all four items in the final packing list.

Challenge 3

Make a movie-night checklist. Start with two items of your choice, ask the user for a third, append it, and display the finished list with a clear heading.
